

MASS's expertise in test equipment has been applied to a variety of tasks including:

- Test System Design and Integration
- Equipment Build and Commissioning
- Data Gathering and Analysis
- Hardware in the Loop Simulations

This has been achieved on both component and systems test solutions utilising a combination of bespoke and COTS hardware and software.

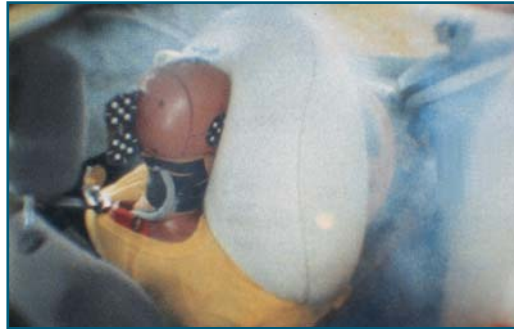

MASS also has a long track record supplying staff to work as part of a client's project team to aid in bid evaluation, technical development or project management.

MASS has two decade's experience of providing test equipment to a wide range of industries. Our clients include:

- Equipment Manufacturers
- Component Suppliers
- Proving Grounds and Test Facilities
- End User Evaluation Teams
- Support Service Providers

Applications have included:

- Missile Firing Controller Test Equipment
- Engine Test Cells
- Crash Test Camera Controllers
- Test Equipment for Prototype Components
- End of Line Test Equipment for Components and Systems
- On Vehicle Test Equipment
- Mechanical Alignment Systems
- Radio System Simulators
- Databus Monitoring and Recording Systems
- RF and Radar Signal Recording and Analysis Tools
