E: contact@mass.co.uk**MASS CYBER SERVICES**

You need cyber security you can trust; we work in the most secure organisations in the world, protecting and securing their data. With decades of experience we'll work in partnership with you to ensure you have the edge.

**PENETRATION TESTING**

Penetration testing provides assurance of the cyber security of your IT systems by attempting to breach some, or all, of that system's security, using the same tools and techniques as a threat actor would.

Our consultants go the extra mile to identify vulnerabilities and demonstrate how they can be exploited. We ascertain what the impact of the exploit is and offer clear and relevant remediation advice. We also clearly identify where lower-risk vulnerabilities can be chained for greater impact, raising their overall risk and priority for remediation.

Cyber essentials

Cyber Essentials is a government-backed scheme to help organisations protect themselves. As an official certification body, we can help you through every stage of the cyber essentials assessment process. It doesn't matter how big or small you are we can help – plus it's a requirement for many government contracts. To get started email us at CyberTeam@mass.co.uk.

**Cyber essentials plus**

Cyber Essentials Plus is the next level up from Cyber Essentials and is a technical audit of your systems. It has a stricter assessment process but we can guide you through every stage. If you've already got Cyber Essentials but want the increased assurance, contact us on CyberTeam@mass.co.uk.

**IASME Cyber Assurance**

The IASME Cyber Assurance allows small and medium businesses in a supply chain to demonstrate their level of cyber security for a realistic cost and indicates that they are taking good steps to properly protect their customers' information. This reduces barriers to entry for smaller organisations in demonstrating compliance.

///// DON'T FORGET TO RENEW YOUR CYBER ESSENTIALS AND CYBER ESSENTIALS PLUS EVERY YEAR. /////

PROFILE

MASS is an independent, global technology company, trusted by highly-secure organisations to provide advanced, digital services that manage data and keep information safe. With our heritage in defence, we now offer robust solutions to sectors where security expertise is essential. We work in partnership with customers, using skilled, technical experts. We think innovatively to provide tailored, agile and resilient solutions that secure advantage, so you're ready for digital transformation.
